Exam season is near. It is also a time when children are stressed. The main problem of many children is that they have studied all the subjects well but forget them when they reach the exam hall. The most important thing is how to overcome this problem. The subject to be studied each day and the method to be followed should be planned first. Approaching any exam with proper planning is sure of success. Don't wait for the exam timetable to start your studies. Do you need to devote special time to study...? This will be a question in the mind of many people. Everyone has a preferred time for studying. Some prefer to sit up late at night and study. Some prefer to wake up early in the morning to study. It is best to let children learn according to their will. In the same way, it's not important how many hours you study; it's about how effectively you study the lessons. Some can learn quickly in a short period. Some need more time. Take breaks while studying. After studying for an hour, you can take a break of upto ten minutes. The place you sit to study is also an important factor. Some prefer to study alone. It is best to sit and study in a comfortable place. Make sure that there is good light and proper air in the room where you sit to study. It is very important to remember what you have learned without forgetting it. As you study each topic or lesson, trying to connect it to an object or an activity in your daily life. This can help to boost your memory. Learning by writing also improves your memory. Every day after coming back from class try to recall the portions taught as much as possible on the same day. This way forgetfulness can be dealt with.

Time management is the most important thing in a student's life. Time is precious and should never be wasted on idleness and frivolity.

Should Plastic Be Banned?

Plasticity of a plastic makes it possible for plastics to be moulded. This is why we use plastic in a wide range.

Plastics are found everywhere. If you move out of your house, its impossible to see a no plastic region. You will slowly discover more and more plastics.

Mostly plastics are used for packing and roughly in buildings such as piping or plumbing.

The world's first plastic was Bakelite. Today dozens of different types of plastics are produced such as polythene. These plastics as you know cannot be decomposed as it takes millions of years to get rid of these plastics.

Now we are in 2023 Enormous amount of plastics will fill the oceans and land by 2040. What difference can we expect within these years?

Darkness Prevails

It was a bright Monday morning, Winston had taken a month off from work to relax and enjoy. My friend and I decided to make best use of this time. So, we decided to meet at the local park and plan on what to do for a month. “We should go on a trip to New York City” said I “That seems a bit boring” said Winston. Winston and I were adventurous. We liked doing all sorts of crazy things. We sat there in silence and suddenly something struck our minds, “THE BLOOD RED FOREST!” both of us shouted at the same time. So it was set. We were going on a trip to the Blood Red Forest.

A myth was prevalent in our town. The people believed that the Blood Forest was paranormal and haunted. My friend and I being the thrill seekers, decided that it was a good idea to explore the forest.

It was the next day. Tuesday at 10’O clock in the morning that we were prepared and were ready to go. We arrived at the forest at noon. We setup our tent and a campfire. Nothing was going wrong, it was a normal evening, until, we heard cries of a child from the forest. We just disregarded it as ambience. The sound got louder, more persistent, more..... desperate. We decided to take a look into it was 9’O clock in the night. The sky was dark like a never ending void. We went towards the sound, until I realized that Winston and I had split up. I ran like an moron hitting trees, avoiding everything until, I saw IT! A completely dark humanoid being with a smile wider than normal ... A demonic smile and worst of all, it held Winston who had fallen into the clutches of the beast. I had no other choice but to face the inevitable, my death. And in the end THE DARKNESS PREVAILED..

Adolf Hitler - The boy who failed Art School!

The origin of German fascism goes back to 1919 when a group of seven men met in Munich and founded the National Socialist German Worker's Party (Nazi Party). One of them was Adolf Hitler. A gifted speaker, he could whip up the passion of the audience. Hitler replaced the symbol of the Weimar Republic by the Swastika Banners of National Socialism.

The Academy of Fine Arts judged Hitler's drawings "Unsatisfactory". Grienkerl also became famous posthumously for having rejected Adolf Hitler's application to train at the Academy of Fine Arts, Vienna. Richard Wagner (1818-1883) was Hitler's favourite composer. During World War I, it was reported that he carried Wagner's music from Tristanin. Often, Hitler had Wagner's music performed at party rallies and functions. This guy failed his Art School but now his work has been offered at auction multiple times, with realized prices ranging from 8 USD to 12,000 USD, depending on the size and medium of the art work! As a matter of fact, the United States owns four of Hitler's water colours after they were confiscated during World War-II. The largest collection of paintings by Hitler can also be found in the US at the International Museum of World War-II. Adolf Hittler was the man who failed his art school, but now his art works are so valuable and expensive. By this point, we can all say that one should never judge a book by its cover.

பொங்கல்

நோயற்ற சுகத்தைப் பெற்று!
மாசற்ற செல்வத்தைப் பெற்று!
அன்புடைய சுற்றத்தைப் பெற்று!
இதயத்தில் இன்பத்தைப் பெற்று!
மகிழ்ச்சியுடன் கொண்டாடுவோம்.

இனிய பொங்கல் திருநாள்
நல்வாழ்த்துகள் !!

புதிய நெல்லை அறுத்து வந்து
பொதிந்திருக்கும் உமியகற்றி
புத்தரிசி முத்தெடுத்து
பொங்கலிடும் வேளையிலே
பொங்கலோ பொங்கலென
பாவையரும் குலவையிட
பொங்கி வரும் பொங்கலைப் போல்
பொங்கட்டும் மகிழ்ச்சியெங்கும்!

ஜெ. அபரியா

Black Hole

Black Holes are one of the strangest things that exist in our universe. There are millions of black holes. Now, let us understand the creation of the black holes through this article.

Formation of Black holes

Black holes are not formed by the universe, they are formed by an accident that occurs in a star. Stars are incredibly massive collection of mostly hydrogen atoms that collapse to form enormous gas cloud under their own gravity. In the core of a star, a reaction called nuclear fusion crushes Hydrogen atoms into Helium. Due to this, a tremendous amount of energy is released. So, this energy, which is in the form of radiation, pushes against gravity and maintains a delicate balance between the two forces. So as long as there is fusion in the core, the star will be stable. The heat and pressure at the core allows them to fuse heavier elements until they reach Iron. Unlike other elements which was fused before the fusion process of Iron, it doesn't generate any energy. So Iron starts to build in the centre of the star until it reaches a critical amount and then the balance between gravity and radiation is suddenly broken. Thus the core of star collapses with a fraction of a second; the star implodes moving at about the $\frac{1}{4}$ of the speed of light and feeds more mass into the core it this time all heavier elements in the universe is created as the star dies in a supernova explosion. So this produces either a neutron star or a black hole.

Be Blissful

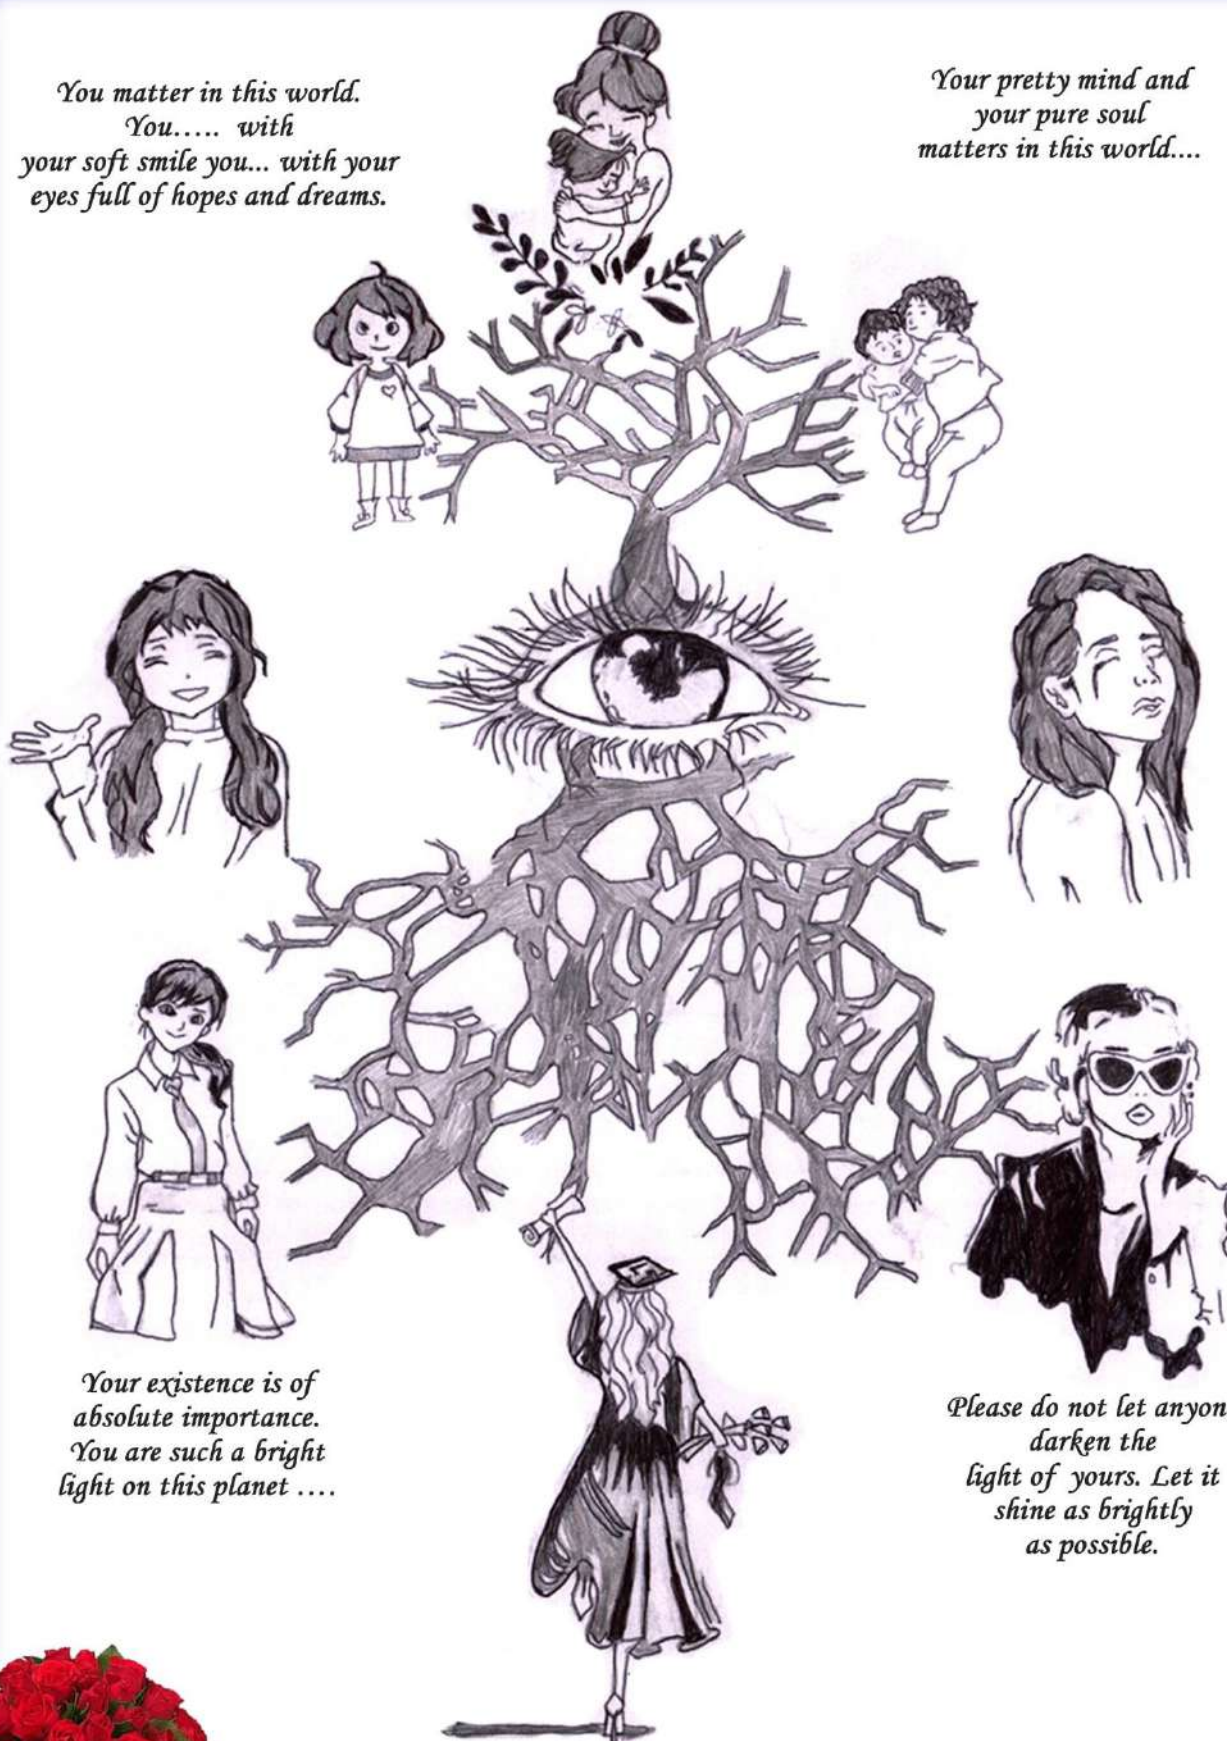

When a bird flies in the sky, we expect it to fly even more higher. When trees grow, we expect them to bear the best fruits. A teacher expects his/her students to score well. Likewise, we expect more and all these our own expectations. People have high expectations on us, so let us try to prove them that we are beyond their expectations. Your decision as a student today will define your tomorrow. The right decision is the hardest to make. It will sometimes break you, but it will also push you to change yourself and seek what you are really worthy of. The secret of happiness is 'lower your expectations and face life as it comes'. So always remember life is an unexpected journey, do not expect anything from anyone. Take a wise decision today, so you need not cry tomorrow. This is your time to shine, do not wait in line. Choose the right path without any expectations and be the best version of yourself.

Stay positive and spread positivity.

பொங்கல் வாழ்த்து

வியர்வையை மண்ணுக்கு உரமாக்கி!

வெயில் மழை பாராமல் பாடுபட்டு!

விளைத்தெடுத்த நெல் மணிகளில்

புத்தரிசி முத்தெடுத்து!

மஞ்சள் கொத்தெடுத்து!

மாமரத்து இலையோடு

இஞ்சித் தண்டோடு

எறும்பூரும் கரும்போடு

வட்டப் புது பாளை

வாயெல்லாம் பால்பொங்க!

பொங்கி வரும் பொங்கலை போல்

வறுமை நீங்கி செல்வம் பொங்கட்டும்!

வறட்சி நீங்கி வளமை பொங்கட்டும்!

அறியாமை அகன்று அறிவு பொங்கட்டும்!

இருள் மறைந்து ஒளி பொங்கட்டும்!

சாதி மத பேதமில்லா

தமிழர் சமூகம்

சங்கமிக்கும் திருநாளில்!

துவண்டு கிடக்கும் எம் சமுதாயம்

துணிந்து எழச்செய்வோம்!

பொங்கும் தமிழாய் எழுவோம்!

புவியெங்கும் எம் பெயர் பதிப்போம்!

பொங்கி வரும் பொங்கலைப் போல்

உள்ளம் மகிழட்டும்

உறவுகள் இணையட்டும்!

உற்சாகம் பொங்கட்டும் என

**பொங்கல் வாழ்த்துகளிகளை தூவுகின்றேன்
வாழ்த்துகளுடன்**

Spring

1000 years ago, a small sapling was planted by an evil witch. The witch did some magic and year by year the tree grew very big, almost like a forest. This tree possessed some super natural power. The witch wanted the tree to come to life, so she placed a huge magical boulder next to it. When the tree hears the sounds from the stone, it gets life and destroys the living beings and the animals. The tree gets life every 200 years. The witch also made a small blue stone, which controled the entire tree. But the tree chose its own master. It chooses the one who had courage, humility and respect. But if the sound was not made or if the owner doesn't have the stone the tree will get mad and chase them to kill them. The tree was hidden under the clouds in the SPRUCE FOREST. The one who dared to go inside had never come back, unless he / she is brave. The tree couldnot survive in the sunlight. If the tree comes under the sun, the clouds disappear and the tree dies.

A girl was born in the village and she was the one who was destined to destroy the tree. The girl grew up and also had a puppy. They made a good team. The girl and the puppy were ready to fight the trees. She got a sweater and travelled with her puppy. She finally came to spruce forest. It was covered with snow and the clouds were hiding the sun. The girl entered the forest. The forest was extremely cold and the girl was shivering. But she made up her mind and started the journey. After a long time, her puppy spotted the large boulder. She was surprised to see the size of the rock. She took her stick and hit the boulder, which made a huge sound. The quiet forest started trembling and the roots slowly got up and the tree came back to life and moved its trunk slowly towards the girl. The girl kneeled down and surrendered. The tree liked the girl's courage and her humility, as a normal girl would run away from it. But she faced the tree and surrendered herself. The tree began to make music by hitting its branches on the girl's stick. The tree gave the blue stone to the girl. The girl attached the blue stone to her stick and it turned to bright orange color. The girl made a music with her stick and the trees got up and started to move behind her. The girl tripped over a stone and fell down and dropped the stone. The stone rolled its way to the edge of the cliff where they were standing. Fortunately, her puppy stopped the stone and gave it to her and she controlled the tree again. She made her way to the sunlight and the trees died. The clouds disappeared and the ice started melting forming rivers and lakes. As the sun rose, the flowers bloomed and the plants started growing. A beautiful rainbow began to shine. The people came outside their houses and praised the girl and her puppy. The girl became "The Queen of Spring". She wore a dress decorated with flowers. This marked the beginning of "SPRING" on earth!
